

Altice USA Statement on Winter Storm Toby

Spring is here...but Altice USA is prepared for this latest Nor'easter with a fully staffed team on standby across the tri-state area to assist our customers. As is the case with most storms, service disruptions are typically caused by power outages or damage from strong winds and downed trees, and in those cases we will work as quickly as possible once power is restored and conditions are safe for our employees.

As a local company, we know how important it is for our customers to stay connected, so we've created a resource guide with tips and details to remember during a storm. To learn more visit Optimum.net/StormPrep. Stay safe.
